## QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDING 31 MARCH 2026

### Luni Niobium Project

- Infill drilling within the existing Indicated MRE envelope at Luni continues to return exceptionally high-grade intersections, including:

LUDD-0156 from 42.0m: **25.3m at 3.0% Nb<sub>2</sub>O<sub>5</sub>**

LUDD-0159 from 46.7m: **12.4m at 6.1% Nb<sub>2</sub>O<sub>5</sub>**

LUDD-0181 from 62.0m: **16.0m at 5.6% Nb<sub>2</sub>O<sub>5</sub>**

LUDD-0182 from 44.6m: **9.4m at 9.3% Nb<sub>2</sub>O<sub>5</sub>**

- Drilling directly adjacent to the existing western Indicated MRE envelope provides a strong basis for conversion of additional high-grade mineralisation into higher confidence categories, including:

LUDD-0219 from 56.5m: **6.5m at 6.6% Nb<sub>2</sub>O<sub>5</sub>**

LUDD-0225 from 67.8m: **93.1m at 2.1% Nb<sub>2</sub>O<sub>5</sub>**

LUDD-0231 from 41.4m: **12.7m at 5.0% Nb<sub>2</sub>O<sub>5</sub>**

- Assay results from the east of Luni extended mineralisation over 400m beyond the current MRE envelope, including:

LUAC-0188 from 32m: **28m at 2.5% Nb<sub>2</sub>O<sub>5</sub> (to EOH)**

including from 36m: **17m at 3.8% Nb<sub>2</sub>O<sub>5</sub>**

LUAC-0190 from 103m: **29m at 1.4% Nb<sub>2</sub>O<sub>5</sub> (to EOH)**

including: **14m at 2.5% Nb<sub>2</sub>O<sub>5</sub>**

- All data inputs now received for a MRE update expected in the June quarter
- Essential data capture activities were completed in 2025 and are facilitating project development studies, permitting and approvals workstreams

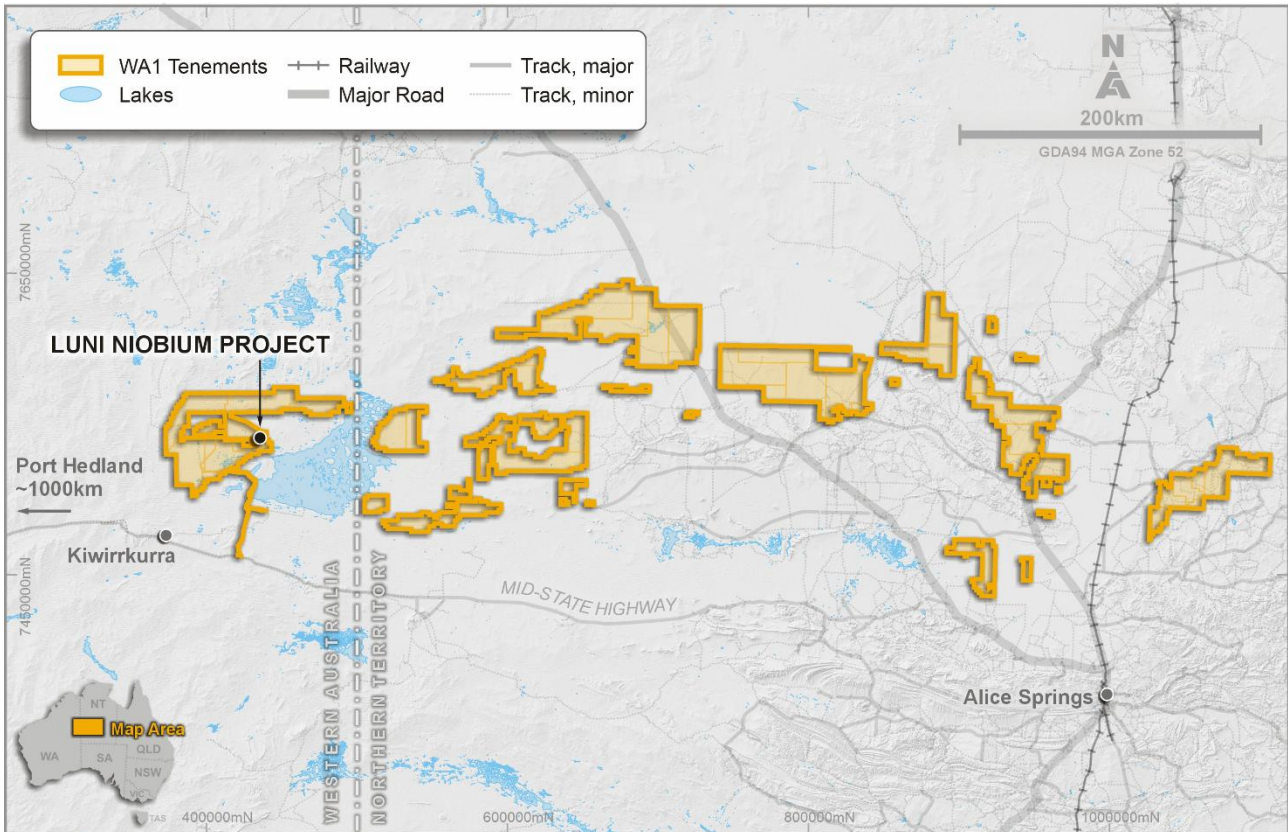

### Corporate

- Cash balance of approximately \$131 million as at 31 March 2026

WAI Resources Ltd (ASX: WAI) (**WAI** or the **Company**) is pleased to provide a report on its activities for the quarter ended 31 March 2026.

### **Luni Niobium Project (100% owned)**

The Company's flagship Luni Niobium Project (**Luni** or the **Project**), contained within the broader West Arunta Project, is located in Western Australia approximately 590km west of Alice Springs.

## Site Activities

### Drilling Results

An extensive drilling campaign was completed at Luni in 2025 with a combination of diamond, aircore (**AC**) and mud rotary methods utilised for various purposes. Assay results from the campaign continued to be reported during the quarter and related to both diamond drilling and AC programs. Drillholes were variably spaced, with most being between 50m and 200m apart.

The diamond drilling program has been primarily focused on resource definition to strengthen confidence in niobium mineralisation captured within the current Mineral Resource estimate (**MRE**). This drilling has generally been undertaken on a 50m by 50m staggered grid pattern in the eastern and western Indicated-category zones and on a 100m by 100m staggered grid pattern in the western Inferred-category zone.

The diamond drillholes reported during the quarter further support the continuity of high-grade niobium mineralisation and provide increased definition of the geometry, thickness and grade across the deposit. These results will be an input to an MRE update planned for the June quarter and will target increased confidence of key high-grade Inferred zones of Luni.

Assay results from AC drilling reported in the quarter were testing for potential extensions to mineralisation in the eastern area of Luni, proximate to the boundary of the MRE. The drilling also sought to sterilise areas to inform site layouts for potential development scenarios. This drilling was generally undertaken at 100m to 200m spacing.

A number of the AC drillholes have defined meaningful high-grade niobium mineralisation extending beyond the MRE envelope. This mineralisation is interpreted to be associated with a series of parallel carbonatite dykes separated by variably altered gneiss and syenite units that trend northeast as offshoots from the main carbonatite plug.

The orientation of enriched, oxide mineralisation (true width) intersected to date is generally sub-horizontal and coincident with the transition between intensely and moderately weathered carbonatite. Drilling to date has primarily focused on outlining mineralisation in the weathered zone of the Luni carbonatite. The potential for primary mineralisation in the deeper, unweathered zone is considered significant and is planned to be tested in future drilling programs.

### Project activities

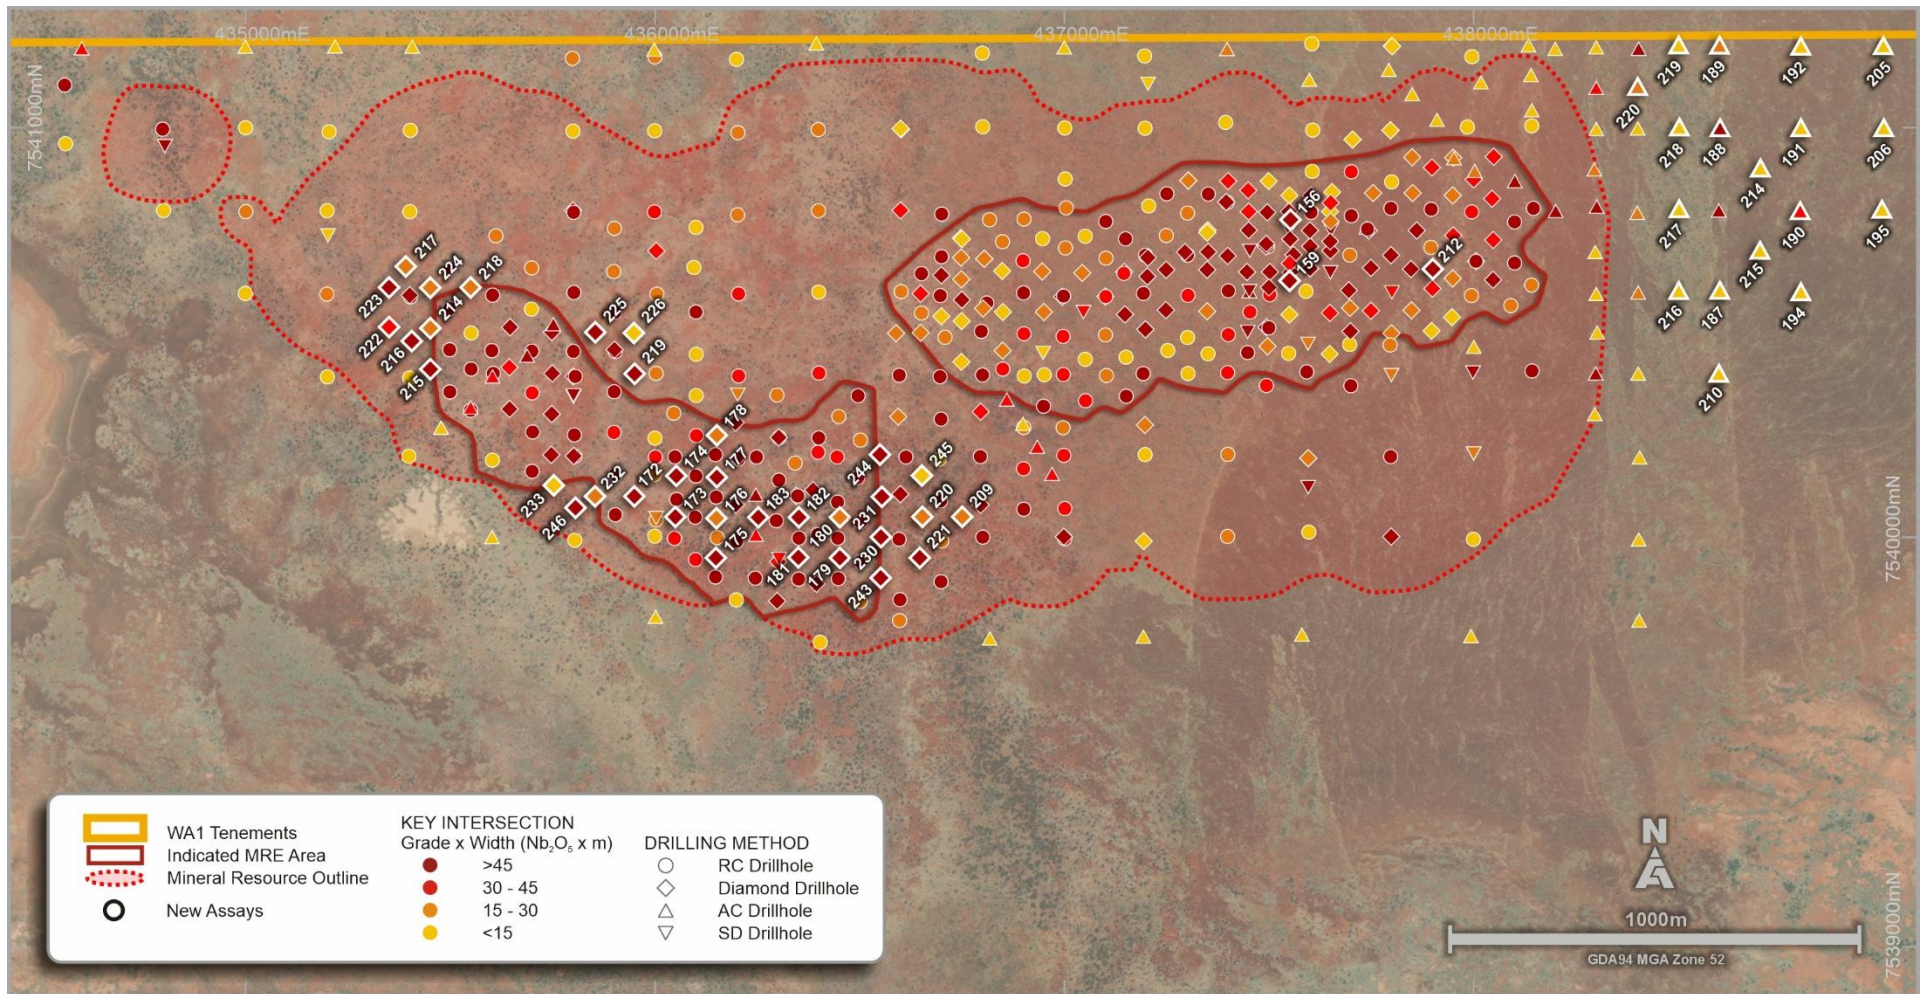

Site activities paused late-December 2025 and recommenced in January 2026. Construction activities associated with the airstrip included ongoing work experience programs for Traditional Owners (Figure 2). This continues to build a connection between the Project and local communities, with insights from this work experience program intended to support the development of future collaborative initiatives.

Rainfall throughout the quarter has prolonged completion of certain site works and the commencement of drilling for 2026. Drilling at Luni will commence in the coming weeks and remain focused on advancing metallurgical, resource definition and geotechnical workstreams.

During the quarter, activities primarily focused on integrated desktop studies informed by the data captured at Luni to date. This work spanned multiple disciplines and advanced key mid-term Project workstreams, including development studies and approvals.

For previously released results refer to ASX announcements from 2023 through to today

### West Arunta Project (100% owned)

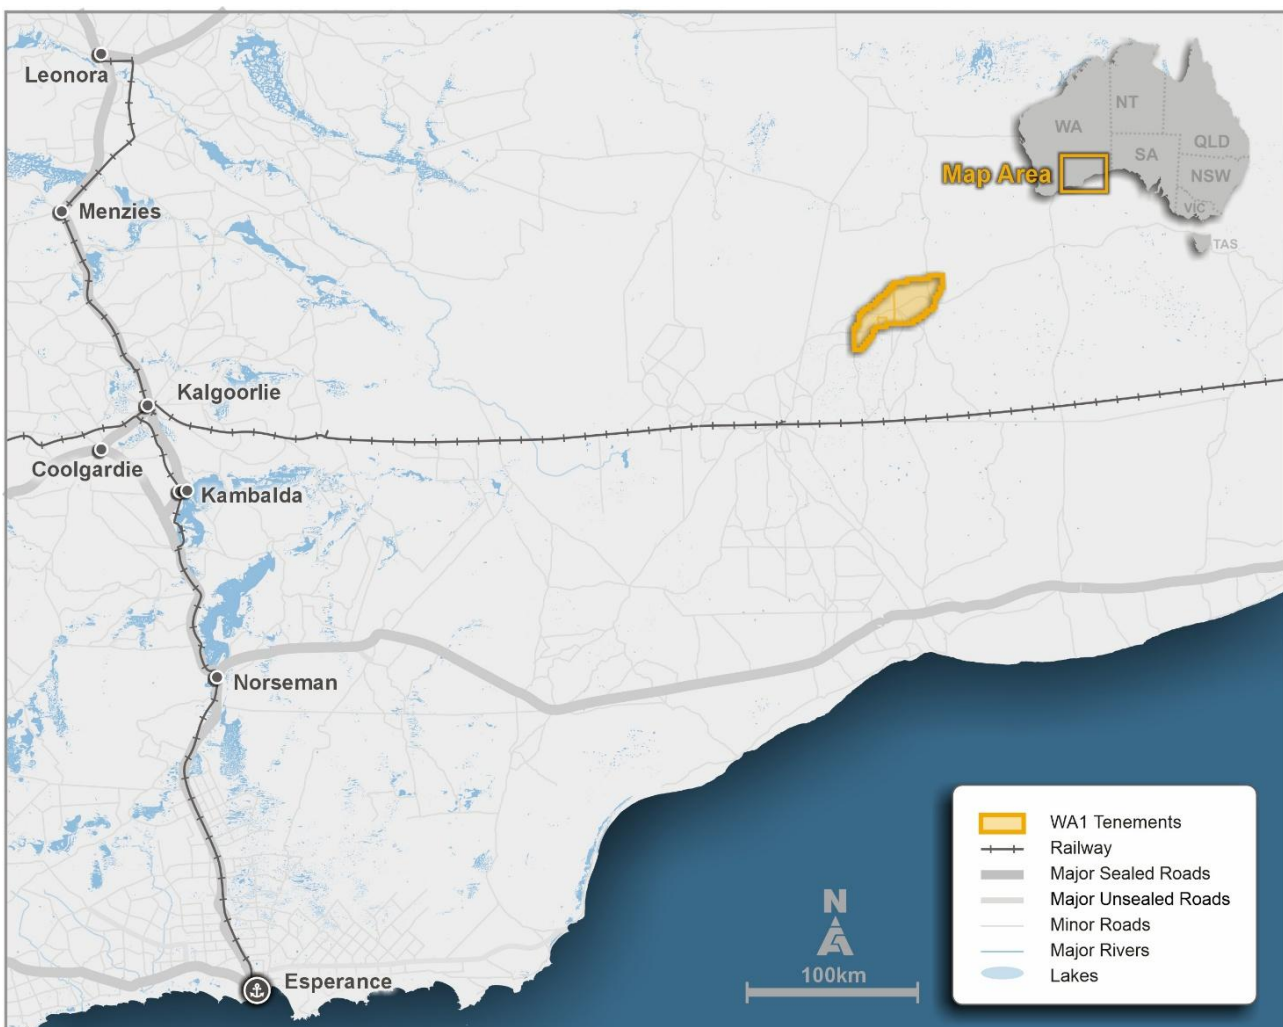

The Company holds an extensive package of exploration licences near the Luni Niobium Project and across the broader Arunta Orogen in Western Australia and the Northern Territory (Figure 1).

During the quarter, the Company continued extensive desktop compilation and review of the package to assist with targeting and continued engagement with stakeholders to progress land access. A number of tenements were rationalised and some new applications were made during the quarter as a result of this work. No on-ground exploration was conducted during the quarter.

### Madura Project (100% owned)

The Company's Madura tenements are located approximately 430km east of Kalgoorlie. The exploration project comprises three granted Exploration Licences in the Madura Province of southeastern Western Australia.

During the quarter, the Company continued engagement with stakeholders in relation to land access. No on-ground exploration was conducted during the quarter.

**Figure 4: Location of the Madura Project**

## New Project Generation

The Company is primarily focused on exploration and pre-development activities at its existing projects, however, continued efforts are also allocated to identify and assess modifications to the Company's exploration portfolio.

## Corporate

On 11 March 2026, the Company released its interim financial statements for the half-year ended 31 December 2025.

At quarter-end the Company held approximately \$131 million in cash.

## Summary of Expenditure Incurred on Activities

During the quarter, the Company incurred expenses of \$5,665,150 which for accounting purposes has been allocated to exploration and evaluation activities, and related to field activities, studies and consultants.

Key pre-development site works continued during the quarter, with the Company incurring expenses of \$2,050,264 which for accounting purposes, has been allocated to development activities.

## Payments to Related Parties of the Entity

A description of and explanation for payments to related parties and their associates per section 6.1 of the Appendix 5B for the quarter ending 31 March 2026 is set out in Table 1.

## About WA1

WA1 Resources Ltd is an S&P/ASX 300 company based in Perth, Western Australia and trades under the code WA1.

WA1's objective is to discover and develop Tier-1 assets, including the Luni Niobium Project, in Australia's underexplored regions and create value for all stakeholders. We believe we can have a positive impact on the remote communities within the lands on which we operate. We will execute our exploration and development activities using a proven leadership team which has a successful track record of working in WA's most remote regions.

## Forward-Looking Statements

This ASX Release may contain certain "forward-looking statements" which may be based on forward-looking information that are subject to a number of known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially from those presented here. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. For a more detailed discussion of such risks and other factors, see the Company's Annual Reports, as well as the Company's other ASX Releases. Readers should

not place undue reliance on forward-looking information. The Company does not undertake any obligation to release publicly any revisions to any forward-looking statement to reflect events or circumstances after the date of this ASX Release, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg *Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
