## **Director Resignation**

**Melbourne, Australia, 4<sup>th</sup> July 2025:** dorsaVi (ASX:DVL) (dorsaVi or the Company) advises that Mr Michael Winlo has tendered his resignation as Non-Executive Director to focus on his other business commitments.

dorsaVi extends its sincere thanks to Mr Winlo for his insights and contributions during his time on the Board.

As part of the Company's renewed strategic focus, DVL is actively looking to hire executives and advisers with strong expertise in RRAM and semiconductor technologies. The Company is particularly interested in candidates with proven experience in advanced memory architectures, semiconductor design, and related commercialisation pathways. These appointments will play a critical role in guiding the company's next phase of innovation and growth.

Non-Executive Chairman Mr Gernot Abl said: *"we are particularly excited to commence our RRAM journey and how this technology might significantly enhance the performance of our sensors. I look forward to building an executive team to deliver against these objectives."*

This release has been authorised for lodgement by the Company's Board of Directors.

## About dorsaVi

dorsaVi Ltd (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in clinical applications, elite sports, and occupational health and safety. dorsaVi believes its wearable sensor technology enables, for the first time, many aspects of detailed human movement and position to be accurately captured, quantified, and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours. dorsaVi's focus is on two major markets:

- **Workplace:** dorsaVi enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to OHS workplace design, equipment or methods based on objective evidence. dorsaVi works either directly with major corporations, or through an insurance company's customer base with the aim of reducing workplace compensation and claims. dorsaVi has been used by major corporations including London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Boeing, Monash Health, Coles, Woolworths, Toll, Toyota, Orora, Mineral Resources and BHP Billiton.
- **Clinical:** dorsaVi is transforming the management of patients with its clinical solutions (ViMove+) which provide objective assessment, monitoring outside the clinic and immediate biofeedback. The clinical market is broken down into physical therapy (physiotherapists), hospital in the home and elite sports. Hospital in the home refers to the remote management of patients by clinicians outside of physical therapy (i.e. for orthopaedic conditions). Elite sports refer to the management and optimisation of athletes through objective evidence for decisions on return to play, measurement of biomechanics and immediate biofeedback to enable peak performance.
