

ASX ANNOUNCEMENT

ASX: CDE | 28th August 2025

UPDATE ON ANTENNA TRANSFER ACQUISITION & TIMING

ANTENNA TRANSFER (QUANTUM.AI SECURE) TO DEVELOP SECUREVAULT AUTO-DESTRUCT AND APPLE WALLET ENABLED QR CODE

Codeifai Limited (ASX: CDE) a dynamically growing disruptor in the AI, quantum-security, and QR code space, is pleased to announce that Credissential Inc (WHIP.CSX) has on 15 August 2025 [announced](#) to market **two exciting features being developed for the Antenna Platform** (to be renamed *QuantumAI Secure*) being acquired by Codeifai from Credissential Inc:

1. **SecureVault Auto-Destruct; and**
2. **Apple Wallet enabled QR code**

Antenna Transfer is developing these capabilities to enable users to configure transferred files to **automatically delete from Antenna servers** after successful download, providing an additional layer of data protection for sensitive communications; and enable users to use the **Antenna Platform for cashless transactions through existing Apple Wallet** infrastructure.

The Company believes that the development of the SecureVault Auto-Destruct feature will represent an advancement in secure file transfer technology, addressing growing enterprise and government demands for enhanced data lifecycle management and compliance capabilities. The Company also believes that it will help the Antenna platform become less vulnerable to data leaks by no longer housing sensitive files that have been successfully transferred.

*"The Auto-Destruct feature is intended to give our users control over their sensitive data," said **Colin Frost, Chief Executive Officer of Credissential**. "This feature is will ensure that confidential files don't persist longer than necessary, reducing security exposure and helping organizations and individuals meet data retention policies and desires."*

In addition to SecureVault Auto-Destruct, Credissential has also announced development of a follow-on feature to enable payments via scan-to-pay QR code that can be added to Apple Wallet. This integration, currently in the research phase, is designed to streamline transactions, enhance user convenience, and expand the functionality of the Antenna Transfer (QuantumAI Secure) platform.

"The planned SecureVault Auto-Destruct feature is designed to give our users control over their sensitive data, with the goal of ensuring confidential files don't persist longer than necessary and helping organizations meet strict data retention policies," said Colin Frost, Chief Executive Officer of Credissential. "We're also planning Apple Wallet integration for Antenna Transfer, which could streamline payment processing and make our platform even more accessible to users seeking seamless payment capabilities."

The Company anticipates that these new developments will integrate with Antenna's existing post-quantum cryptographic security protocols, offering users selectable auto-deletion timeframes, confirmation protocols, and payment options to ensure data is permanently removed from all system components following successful transfer completion while enabling fast, secure payment processing.

Development of Auto-Destruct and scan-to pay QR code are currently in the development phase, with full implementation expected to be completed following the acquisition of Antenna by Codeifai Limited, as announced on [July 1, 2025](#).

The integration of Antenna Transfer with Codeifai brings together two complementary platforms to create enhanced transactional security, reduce operational risk to potentially millions of businesses and individuals, and promotes a seamless end user experience. By acquiring Antenna Transfer, Codeifai will have an extremely unique and innovative product offering, paving the way for next-generation financial infrastructure.

Antennae Transfer Update and revised timeline

Codeifai is currently completing its due diligence on the proposed acquisition of Antenna Transfer, and the parties are working collaboratively towards finalising the transaction. Since announcing the transaction, Codeifai has undertaken a comprehensive assessment of the proposed acquisition, and not identified any 'red flags' to date, and intends to seek shareholder approval at the next General Meeting of shareholders (to be held first week of October) to enable completion of the proposed acquisition. The Company is finalising preparation of the Notice of Meeting and will lodge it shortly.

Commenting on the proposed acquisition, **Colin Frost CEO of Credissential** said *"We're incredibly pleased with the progress of integrating Antenna Transfer into Codeifai's ecosystem. This marks a significant milestone in our mission to deliver quantum-secured, future-proof payment and file transfer solutions at scale, enhanced by the use of QR Codes."*

There is no specific update on the Trust Codes proposed acquisition however due diligence is continuing with focus now on planning the potential integration of our mutual platforms.

In providing this acquisition update CDE also notes that the original proposed timetable has been revised as outlined on the below indicative timetable:

Revised Proposed indicative Timetable

ASX Release	1 July 2025 (announced here)
CDE Calls Shareholder Meeting	4 September 2025
CDE Holds Shareholder Meeting	8 October 2025
Closes Acquisition	10 October 2025

Codeifai's Vision – an AI-driven future

Codeifai's vision is to shape a future powered by artificial intelligence, where data is not just processed, but truly understood and Quantum Secured. We aim to build a transformative tech company at the forefront of AI-driven, machine learning data interpretation—unlocking deeper insights, enabling smarter decisions, and driving innovation across industries. We believe the future belongs to those who can harness the full potential of data through AI, and our mission is to make that future secure, accessible, intelligent, and impactful for businesses everywhere.
