

ASX RELEASE | CLEARVUE TECHNOLOGIES LIMITED
(ASX:CPV | OTC:CVUEF)

ClearVue receives \$935k R&D Tax Credit

HIGHLIGHTS

- ClearVue has received AUD \$935k R&D tax credit from the Australian Taxation Office related to the Australian Government Research & Development Tax Incentive
- ClearVue releases its latest Newsletter

8 November 2023: Smart building materials company ClearVue Technologies Limited (ASX:CPV) (*ClearVue* or the *Company*) has received an R&D tax credit from the Australian Taxation Office of \$935k.

ClearVue's R&D tax credit claim under the Australian Government Research & Development Tax Incentive related to research and development work completed during the last year on activities including development and production of its Generation 2 ClearVuePV pilot IGUs; the development and production of key components like solar strips and connector blocks; new materials development and testing for its proprietary PVB interlayer; the Company's research program with research partner D2 Solar in the US; and greenhouse research work being conducted at Murdoch University in Western Australia amongst a range of other R&D work.

Global CEO Martin Deil said:

"We maintain a robust pipeline of R&D activities to future-proof and advance our core solutions, including ClearVue^{PV} Solar Glazing and ClearVue^{PV} Smart Façade. Over the past year, we have made strategic investments in our growth by actively engaging in research on emerging technologies to enhance ClearVue products, as well as advancing our existing products available in the market.

"We appreciate the Australian Government's R&D tax incentive program which encourages and enables Australian companies to be innovative on their path to commercialisation."

ClearVue has released its latest Newsletter, available on the Company's website, and for viewing at: <https://www.clearvuepv.com/november-2023-newsletter/>

The Newsletter provides shareholders and the market the opportunity to further understand the Company's latest activities including:

- Latest news
- Projects updates
- Product trials updates
- Research & Development progress.

Authorized by the Board of ClearVue Technologies Limited.

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Limited (ASX: CPV) is an Australian technology company that operates in the Building Integrated Photovoltaic (BPIV) sector which involves the integration of solar technology into building surfaces, specifically glass and building façades, to provide renewable energy. ClearVue has developed advanced glass technology that aims to preserve glass transparency to maintain building aesthetics whilst generating electricity.

ClearVue's electricity-generating glazing technology is strategically positioned to complement and make more compelling, the increased use of energy-efficient windows now being regulated in response to global climate change and energy efficiency goals.

Solar PV cells are incorporated around the edges of an Insulated Glass Unit (IGU) used in windows and the lamination interlayer between the glass in the IGU incorporates ClearVue's patented proprietary nano and micro particles, as well as its spectrally selective coating on the rear external surface of the IGU.

ClearVue's window technology has application for use in the building and construction and agricultural industries (among others). ClearVue has worked closely with leading experts from the Electron Science Research Institute, Edith Cowan University in Perth, Western Australia to develop the technology.
