

HAZER AND VEOLIA COLLABORATE ON ENVIRONMENTAL APPLICATIONS

Highlights

- *Collaboration with Veolia, a €21.22 billion (A\$37.77 billion)¹ global leader in water treatment and environmental services*
- *Access to world class testing and laboratory facilities in Europe*
- *Testing of Hazer's high-quality graphite in water treatment applications, adding to a growing list of potential uses and supporting market development and potential offtake pathways*

PERTH, AUSTRALIA; 29 September 2025: Hazer Group Ltd ("Hazer" or "the Company") (ASX: HZR) is pleased to announce it has entered into a collaboration arrangement with Veolia, a €21.22 billion (A\$37.77 billion) global leader in water treatment and environmental services, to explore the deployment of the Hazer process and its co-products across a range of applications including water treatment, waste and energy management.

Veolia is a multinational company headquartered in France, specialising in water, waste, and energy management solutions. Operating in over 100 countries, Veolia provides innovative technologies and services to municipalities and industries, helping them reduce environmental impact and improve resource efficiency. Veolia has a strong presence in Australia through its municipal and industrial operations.

This collaboration will investigate the Hazer process, which produces clean hydrogen from methane via catalytic pyrolysis, and evaluate the performance of the high-quality graphite co-product in various applications. The program will leverage Veolia's world class expertise using standardised methods and suitably equipped laboratories, and adds to the growing range of industrial, energy and environmental uses being assessed for Hazer's versatile graphite.

The initiative forms part of Hazer's graphite market development strategy, aimed at creating a diverse range of potential offtake markets and maximising the value of Hazer's unique graphite product across multiple industries.

Hazer's CEO and MD Glenn Corrie said: *"We are delighted to partner with Veolia, a world leading solutions provider to the water, waste and energy industries. This unique collaboration will allow us to investigate how Hazer's technology, producing low-emissions hydrogen and graphite, can solve some of the most pressing challenges facing the water and waste industry today through the integration with Veolia's existing operations."*

This announcement is authorised for release by the Board of the Company.

Forward-looking Statements

This announcement may contain certain "forward-looking statements" which may not have been based solely on historical facts but are based on the Company's current expectations about future events and results.

Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties, assumptions, and other factors, which could cause actual results to differ materially to futures results expressed, projected, or implied by such forward looking statements.

The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statements" to reflect events or circumstances after the date of this announcement, or to reflect the occurrence of unanticipated events, except as may be required under the applicable securities laws.
