About Lithium Plus Minerals

Lithium Plus Minerals Limited (ASX: LPM) is an Australian exploration and development company focused on lithium, gold and critical minerals projects located in the Northern Territory.

Bynoe Lithium Project (100% LPM)

Situated on the Cox Peninsula, 45km south of Darwin, on the northern end of the Litchfield Pegmatite Belt, with 11 granted tenements covering 297km². Geologically centred around the Bynoe Pegmatite Field, the tenements share a border with Core Lithium's Finniss mine development. Significant lithium mineralisation was discovered at Lei in 2017 within the north-northeast trending spodumene bearing pegmatites. Current drill ready targets are Lei, SW Cai, Cai and Perseverance.

Wingate Project (100% LPM)

Located 150km south of Darwin. LPM hold three granted tenements EL31132, EL34006 and EL34007 covering 485km². The tenements cover the Wingate Mountains Pegmatite District, the southern part of the Litchfield Pegmatite Belt. It contains the known presence of pegmatites with little exploration and minor historical production of tin and the historical gold workings at the Fletcher's Gully goldfield.

Arunta Projects (100% LPM)

Barrow Creek

Located in the Northern Arunta pegmatite province, 300km north of Alice Springs. Historic tin and tantalum production and the presence of spodumene in nearby Anningie Pegmatite field suggest lithium potential.

Spotted Wonder

Located approximately 200km north-north-east of Alice Springs with proven lithium and beryllium mineralisation, with amblygonite present in the Delmore Pegmatite.
