All of the Directors of Linden intend to accept or procure the acceptance of any Linden shares (representing 13.2% of Linden's current shares on issue) and options (representing 2.5% of Linden's current options on issue) that they own or control, in the absence of a superior proposal.

“This is an outstanding transaction for both Brightstar and Linden shareholders and aligns with our strategy of becoming a mid-tier gold producer in the near term. This combination will create a gold producer and development company with a material resource base, synergistic operations, strengthening in-house operational expertise and a strong balance sheet that will drive development and growth.

We would like to thank the Linden Board and their major shareholders for their support and note the Board of Linden unanimously recommends this compelling Offer in the absence of a superior proposal.”

The Board of Linden unanimously recommends the Offer and encourages all shareholders to accept the Offer in the absence of a superior proposal.”

STRATEGIC RATIONALE

The merger with Linden is aligned with Brightstar’s strategy to become a mid-tier gold producer from two of West Australia’s most prolific regions, Laverton and Menzies. The transaction delivers Brightstar with;

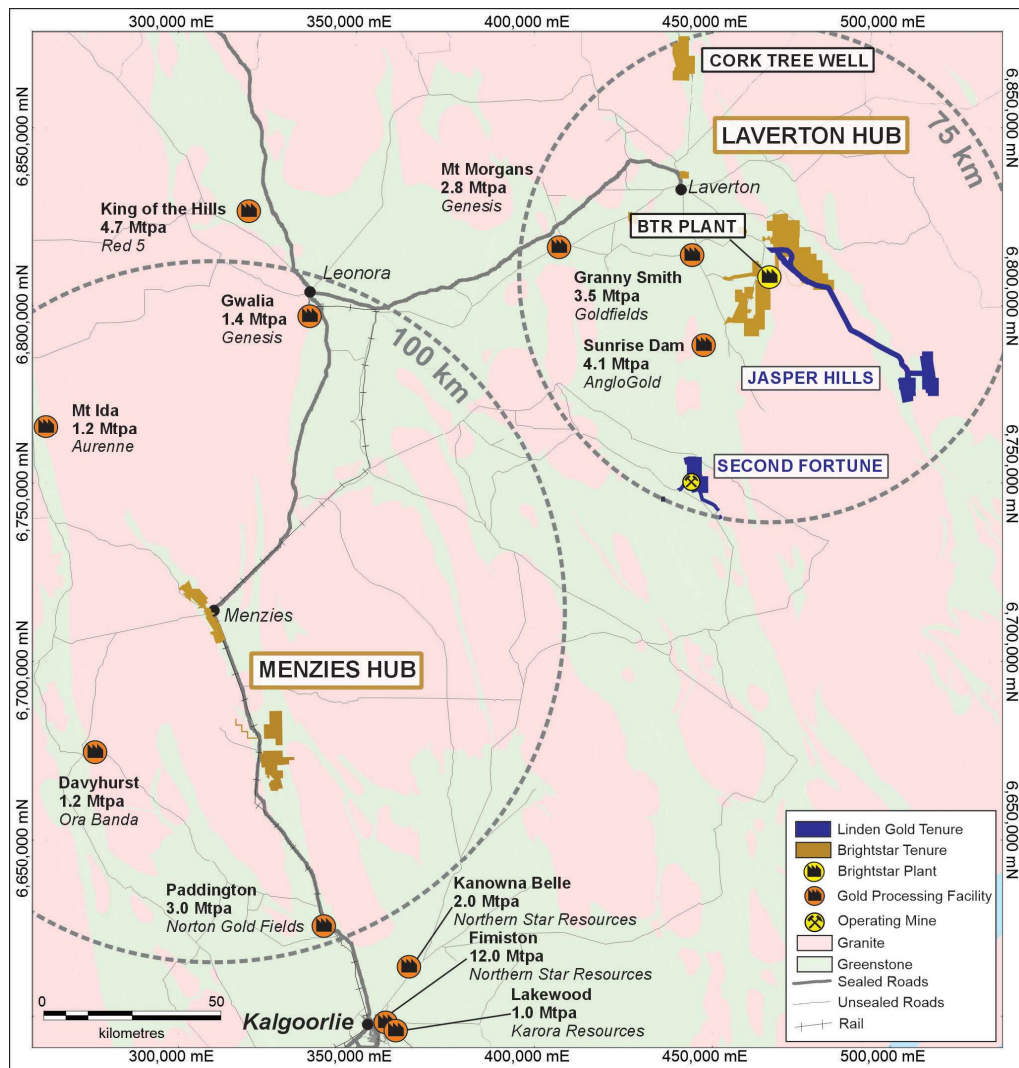

- **Scale & Diversification** - logical consolidation of two highly complementary resources bases that adds scale while maintaining a disciplined focus on mineable ounces
- **Production Growth** – immediately create an operating gold producer (+20koz Au produced in FY24 YTD)⁴ and put’s Brightstar on a low risk, low capex path towards ~100koz per annum⁴
- **Critical Mass** – increased resource base of 1.4Moz provides the critical mass to de-risk the potential restart, upgrade of the Brightstar plant to ‘bring forward’ production ounces and greater flexibility for development scenarios
- **Synergies** – unlocks geographical and operational synergies with proximal assets connected by privately owned haul roads. Enhanced operational capability with two production assets
- **Enhanced Board & Management** – strengthened executive team to be led by Alex Rovira as Managing Director with Andrew Rich (Linden) and Ashley Fraser (Linden) to be appointed as Executive Director and Non-Executive Director respectively
 - o Post successful completion of the Offer, Richard Crookes to be appointed as Non-Executive Chairman of Brightstar

⁴ Refer to Annexure C for Important Notes & Disclaimers

- **Balance Sheet** – following completion of the placement, Brightstar to emerge with approximately \$22m of cash and nil debt (pre costs of the offer). Strong balance sheet provides the platform for accelerated exploration and development activities across the portfolio

LINDEN OVERVIEW

Linden is a public unlisted Western Australian gold mining and exploration company, with operations located 220km northeast of Kalgoorlie and 109km south of Laverton. Linden holds a combination of gold producing and near-term producing assets which are proximate to the processing facility owned by Brightstar in Laverton.

Linden owns and operates the currently producing Second Fortune underground gold mine located south of Laverton. FY2024 year to date, Linden has produced in excess of 13,000oz Au, with ore processed through Genesis Minerals Ltd's Gwalia processing facility (where Brightstar's recent Selkirk joint venture was toll treated).

In addition to Second Fortune, Linden owns the development-stage assets Jasper Hills, which contains a total 4.9Mt @ 1.8g/t Au for 293koz Mineral Resource Estimate (as defined in the JORC Code). As outlined in Brightstar's Jasper Hills Scoping Study (ASX release 25 March 2024), Jasper Hills has the potential to deliver

35koz per annum production to the Brightstar production profile, with an initial mine production target of 2.4Mt @ 1.84g/t Au for 141,958 oz mined over approximately 3.75 years.

The successful completion of the Offer will see Linden's existing operations at Second Fortune and development-ready Jasper Hills project combined with Brightstar's existing Menzies and Laverton Gold Projects to position Brightstar to become a low capex, meaningful gold producer.

OFFER DETAILS

The Offer will be implemented by way of an off-market takeover under the Australian *Corporations Act 2001* (Cth).

Linden shareholders will be entitled to receive 6.9 fully paid ordinary shares in Brightstar for every one Linden share held.

The Offer extends to all Linden shares that are issued as a result of the exercise of Linden options, or vesting of any Linden performance rights held by Linden executives (subject to obtaining any necessary ASIC modifications), during the Offer period. A separate offer will be made in respect of Linden unlisted options currently on issue, whereby Brightstar will offer 6.9 new Brightstar unlisted options for every one Linden unlisted option held on comparable terms, with the exercise price to also be adjusted by the Exchange Ratio.

Further Brightstar will assume the deferred consideration obligations to the vendors of Lord Byron Mining Pty Ltd to Linden and the contingent payment obligations to St Barbara as set out in Annexure B.

Upon successful completion of the Offer, Linden shareholders will own ~32% of Brightstar on an undiluted basis (excluding the Placement).

In addition, a further convertible note with St Barbara equivalent to 10,869,565 Linden shares will be settled directly with Brightstar in Brightstar shares under the terms of the BIA (**SBM Convertible Note**).

Subject to the Offer becoming or being declared unconditional, the Linden Board will notify the holders of the Convertible Notes that Linden wishes to deal with the Convertible Notes in accordance with their terms by requiring the Convertible Notes convert into Linden Shares which will then become subject of the Offer.

Sampling techniques	<ul style="list-style-type: none"> • <i>Nature and quality of sampling (eg cut channels, random chips, or specific specialised industry standard measurement tools appropriate to the minerals under investigation, such as down hole gamma sondes, or handheld XRF instruments, etc). These examples should not be taken as limiting the broad meaning of sampling.</i> • <i>Include reference to measures taken to ensure sample representivity and the appropriate calibration of any measurement tools or systems used.</i> • <i>Aspects of the determination of mineralisation that are Material to the Public Report.</i> • <i>In cases where ‘industry standard’ work has been done this would be relatively simple (eg ‘reverse circulation drilling was used to obtain 1 m samples from which 3 kg was pulverised to produce a 30 g charge for fire assay’). In other cases more explanation may be required, such as where there is coarse gold that has inherent sampling problems. Unusual commodities or mineralisation types (eg submarine nodules) may warrant disclosure of detailed information.</i> 	<p>Jasper Hills</p> <ul style="list-style-type: none"> • Blue Cap Mining supervised drilling that was conducted by industry-standard techniques. • Historical drilling documents reviewed detail drilling methodology appropriate to Gold. • Companies contributing to the drilling database for the purpose of the 2022 Mineral Resource Estimate (MRE): Blue Cap Mining, Sons of Gwalia, Crescent Gold, Focus, Western Mining Corporation, and AngloGold. Drill companies include Topdrill, JSW drilling, Strange drilling, Premium drilling, Ausdrill, Challenge drilling, Drillcorp, On Q Drilling, Connector drilling. • The type of drilling, sample density and drill angles are within industry standards for the deposit style and are adequate for sample representivity. • Historical company reports reviewed did not contain information on the calibration of the measuring tools. • Blue Cap Mining collected samples as single meter intervals and samples sent to Nagrom laboratory Perth for analysis for fire assay. Samples were dried at 105 degrees Celsius, followed by a coarse crush (<3kg). The laboratory used pulped samples, catch weight at 50g, with a lower detection limit of 0.01 ppm Au and an upper detection limit of 10,000 ppm Au. The read type used was an AAS finish. Historical drilling samples were sent to Acquire Laboratory, Kal Assay, SGS Leonora and in a minority of samples the laboratory utilized for analysis is unknown. <p>Second Fortune</p> <ul style="list-style-type: none"> • Linden Gold has used i) reverse circulation drilling to obtain 1m samples from which 3kg samples were collected using a cone splitter. 4m composite

An RC rig with a 120mm (4.75 inch) drill bit. Drill chips were collected by a cyclone and samples split using a riffle splitter attached to the rig, returning a nominal 4kg sample. As of January 2023, 6,500 1m composites were used at Lord Byron deposit for MRE. Of these 5865 were RC and 635 DD. As of January 2023, 3158 1m composites were used at Fish deposit for MRE. Of these 2877 were RC and 281 DD. As of January 2023, 149 1m composites were used at Gilt Key deposit for MRE. All composites were RC. <p>Second Fortune</p> <ul style="list-style-type: none"> Linden Gold RC drilling used in this report entailed 130 – 145mm diameter holes. A face sampling hammer bit of 130 – 145mm was used. Linden Gold diamond drilling entailed orientated NQ2 sized core. Trucore orientation tools were employed.

Drill sample recovery	<ul style="list-style-type: none"> • <i>Method of recording and assessing core and chip sample recoveries and results assessed.</i> • <i>Measures taken to maximise sample recovery and ensure representative nature of the samples.</i> • <i>Whether a relationship exists between sample recovery and grade and whether sample bias may have occurred due to preferential loss/gain of fine/coarse material.</i> 	<p>Jasper Hills</p> <ul style="list-style-type: none"> • For the 2021 Fish mine extension drilling program, drill chips were logged and weighed by site geologists and insufficient sample for laboratory analysis recorded as NS (no sample). • There is no detailed information available to the author of this report on diamond or RC drill sample recovery for historical drilling. It has been assumed drill sample recovery techniques were industry best practice. • The use of a cyclone-mounted cone and riffle splitter is considered industry best practise for RC chip samples. • In the absence of detailed sample recovery information across the Jasper Hills project, a relationship between recovery and grade can not be assessed. <p>Second Fortune</p> <ul style="list-style-type: none"> • For Linden Gold RC drilling, chip sample recovery was visually assessed by the volume of each 1m bulk sample bag. For diamond drilling recoveries were measured by the Linden Gold logging geologist and recorded within the Linden Gold sampling data system. Recoveries were typically 100% except for the top 3m of RC drill holes. • RC drill sample recovery is maximized by pulling back the drill hammer and blowing the entire sample through the rod string at the end of each metre. When composite samples were taken the sample scoop was inserted diagonally through the sample bag to ensure that a representative cross section was collected. • To ensure an even split and to minimize contamination the cone splitter and cyclone was cleaned at the completion of each drill hole. • Due to the excellent drill recoveries obtained by Linden Gold the relationship between recovery and grade was not evaluated.

	<p><i>size of the material being sampled.</i></p>	<ul style="list-style-type: none"> RC drilling returns approximately 30 kg of sample per meter, of which approximately 13% was collected by the riffle splitter for the primary sample. The drilling types and angle of drilling to the mineralisation are considered appropriate. Sample sizes approximated 4 kg and are of industry accepted size for the grain size of the material. <p>Second Fortune</p> <ul style="list-style-type: none"> Linden Gold used a core saw for all half core samples. Core samples taken were a minimum of 0.3m and a maximum of 1.2m but the majority of the sampling was 1m or less. Half core sampling was typically cut 10 degrees off the orientation line. Linden Gold RC sampling was undertaken with 1m samples. Cone splitting of the sample occurred with the majority of the samples being dry. Where it was impossible to maintain dry samples, it was only one or two consecutive samples that were affected. Laboratory processing of the samples was considered to be industry standard. Jaw crushing, riffle splitting of samples >3kg, and pulverisation was undertaken on the samples. Sample sizes are considered appropriate for the rock types associated with the second fortune deposit and are in line with standard industry practice.

The technique provides an estimate of the total gold content. Historical laboratory procedures are determined to be compliant from reviews completed by competent parties such as AngloGold, Crescent Gold, WAA, BMGS and Blue Cap Mining. No geophysical tools were used in the estimation of the Jasper Hills Project deposits. The current data sets used in the BCM 2022 MRE validate correctly.

	<p><i>(ie lack of bias) and precision have been established.</i></p>	<ul style="list-style-type: none"> • AngloGold completed a comprehensive re-evaluation of Jasper Hills deposits in 2004 and reviewed QAQC. • There is no non-compliance of QAQC procedures and results documented by BCM or historical companies with regard to acceptable levels of accuracy. <p>Second Fortune</p> <ul style="list-style-type: none"> • Fire assaying is a total digestion method and photon analysis is a non-destructive method with the entire sample being retained. • Fire assaying is an accepted method for Au sample analysis and is an industry standard technique. Photon analysis has undergone rigorous inter-lab check sampling analysis to ensure that it is suitable for industry use. • Linden Gold also has undertaken a program of check sampling whereby samples that have undergone photon analysis were resubmitted for fire assay analysis with no sampling bias observed. • No onsite geophysical tools were utilised in the analysis of samples by Linden Gold. • Linden Gold submitted certified reference material, blanks, and duplicate samples at a ratio of at least 1:20 to the laboratory. This avoids the use of compositing, which by definition should be on equal sample lengths, which is very difficult to achieve with very narrow veins. • The planar 2D estimate is then migrated back to a conventional 3D block model for mine planning and design. • The mineralisation has been defined by regular spaced drill intersections and mine development into relevant mineralisation domains. Variograms were calculated using Supervisor software with the grade interpolation performed using SURPAC software. • Drill hole intersections were coded into the database with full seam width composites generated. • Top cuts were applied to high grade outliers with assignment of a top cut by utilising log probability plots, histograms, and mean / variance plots using supervisor software. Only Au was interpolated into the resource model. • The parent block size for the 2D modelling was 5m X 5m X 5m with no sub blocking undertaken. For the 3D model parent blocks were 5m X 5m X 5m with subblocks to 2.5m in both Northing and elevation and to 0.078m in Easting. • An orientation ellipsoidal was used to select data and was based on parameters taken from the variography. • Selective mining units were not used in the resource model. • As only Au was estimated there was no correlation analysis undertaken. • Mineralisation was interpreted into mineralised domains that were used as hard boundaries in the grade interpolation. • With the review of the log probability curves the distinct breaks in the data coupled with the outlier sample population, suggests that the application of top cuts is appropriate for the Second Fortune resource. • A three-step process was employed for the validation of the Second Fortune resource model. - (c) Commencing upon the provision of any notice referred to in clause 6.4(a), Linden must as soon as possible advise Brightstar of any material developments in relation to an actual, proposed or potential Competing Proposal, including material amendments or proposed amendments to the terms of such actual, proposed or potential Competing Proposal, and advise Brightstar of the timing of any board meeting to consider that proposal unless (and only to the extent that) the Linden Board, acting in good faith and having regard to external legal advice, determines that it would be a breach of their fiduciary or statutory duties to notify Brightstar.

6.5 Matching right

- (a) Without limiting clause 6.2, during the Exclusivity Period, Linden:
- (i) must not enter into any legally binding agreement, arrangement or understanding (whether or not in writing) pursuant to which a Third Party, Linden or both proposes or propose to undertake or give effect to an actual, proposed or potential Competing Proposal; and
 - (ii) must procure that none of its directors change their recommendation of the Takeover Bid or publicly recommend an actual, proposed or potential Competing Proposal or recommend against the Takeover Bid (provided that a statement that no action should be taken by Linden Shareholders pending the assessment of a Competing Proposal by the Linden Board and its advisers shall not contravene this clause),
- unless:
- (iii) the Linden Board acting in good faith and in order to satisfy what the members of the Linden Board consider to be their statutory or fiduciary duties (having received written advice from its external financial and legal advisers) determines that the Competing Proposal would be or would be likely to be an actual, proposed or potential Superior Proposal;

- (b) If Brightstar proposes to Linden, or announces, amendments to the terms of the Takeover Bid including increasing the amount of consideration offered under the Offers or a new proposal that constitutes a matching or superior proposal to the terms of the actual, proposed or potential Competing Proposal (**Counterproposal**) by the expiry of the 5 Business Day period in clause 6.5(a)(v) above, Linden must procure that the Linden Board considers the Counterproposal and if the Linden Board, acting reasonably and in good faith, determines that the Counterproposal (as completed) would provide an equivalent or superior outcome for Linden Shareholders as a whole compared with the Competing Proposal, then Linden and Brightstar must use their best endeavours to agree the amendments to this agreement that are reasonably necessary to reflect the Counterproposal and to implement the Counterproposal, in each case as soon as reasonably practicable, and Linden must procure that each of the directors of Linden continues to recommend the Takeover Bid (as modified by the Counterproposal) to Linden Securityholders.

6.6 Cease discussions

Linden must, and must procure that its Related Bodies Corporate, cease any discussions or negotiations existing as at the date of this agreement relating to:

 - (i) permitted by clause 6.3; and
 - (ii) that Third Party has entered into a confidentiality agreement with Linden on customary terms and which is no more favourable to the Third Party than the Confidentiality Agreement.

6.8 Compliance with law

- (a) If it is finally determined by a court, or the Takeovers Panel, that the agreement by the parties under this clause 6 or any part of it:

 - (ii) constituted, or constitutes, or would constitute, 'unacceptable circumstances' within the meaning of the Corporations Act; or
 - (iii) was, or is, or would be, unlawful for any other reason,then, to that extent (and only to that extent) Linden will not be obliged to comply with that provision of clause 6.
- (b) The parties must not make or cause to be made, any application to a court or the Takeovers Panel for or in relation to a determination referred to in this clause 6.8.

7. Reimbursement Fee

- (a) Each party acknowledges that, if they enter into this agreement and the Takeover Bid is subsequently not implemented, the parties will incur significant costs, including those set out in clause 7.5.
- (b) In these circumstances, the parties have agreed that provision be made for the payment outlined in this clause 7, without which the parties would not have entered into this agreement or otherwise agreed to implement the Takeover Bid.
- (c) Linden and the Linden Board believe, having taken advice from its external legal adviser, that the implementation of the Takeover Bid will provide benefits to it and its securityholders, and that it is reasonable and appropriate that Linden agree to the payments referred to in clause 7.2 in order to secure Brightstar's participation in the Takeover Bid.
- (d) Brightstar and the Brightstar Board believe, having taken advice from its external legal adviser, that the implementation of the Takeover Bid will provide benefits to it and its securityholders, and that it is reasonable and appropriate that Brightstar agree to the payments referred to in clause 7.3 in order to secure Linden's participation in the Takeover Bid.

7.2 Triggers for payment of Reimbursement Fee by Linden

Subject to clause 7.6 and 7.8, Linden must pay the Reimbursement Fee to Brightstar without set-off or withholding, if:

- (a) during the Exclusivity Period, any one or more members of the Linden Board withdraws, adversely revises or adversely qualifies his or her support of the Takeover Bid or his or her recommendation that Linden Securityholders accept the Offers or fails to recommend that Linden Securityholders accept the Takeover Bid, or, having made such a recommendation, withdraws, adversely revises or adversely qualifies that recommendation for any reason;

 - (i) where that Competing Proposal constitutes a Superior Proposal: or
 - (ii) as a result of any matter or thing giving Linden the right to terminate this deed under clause 9.1;
- (c) a Competing Proposal of any kind is announced during the Exclusivity Period (whether or not such proposal is stated to be subject to any pre-conditions) and, within 12 months of the date of this deed, the Third Party who announced or made the Competing Proposal completes the Competing Proposal ; or
- (d) Brightstar has terminated this agreement pursuant to clause 9.1(a) or 9.1(c).

7.3 Triggers for payment of Reimbursement Fee by Brightstar

Subject to clauses 7.6 and 7.8, Brightstar must pay the Reimbursement Fee to Linden without set-off or withholding, if Linden has terminated this agreement pursuant to clause 9.1(a), 9.1(c) or 9.3(b) or Brightstar Shareholder Approval is not obtained and Brightstar withdraws the Takeover Bid or the Takeover Bid lapses.

7.4 Timing of payment of Reimbursement Fee

- (a) A demand by either party for payment of the Reimbursement Fee under clause 7.2 or 7.3 (as applicable) must:
- (i) be in writing;
 - (ii) be made after the occurrence of the event in that clause giving rise to the right to payment;
 - (iii) state the circumstances which give rise to the demand; and
 - (iv) nominate an account into which the other party is to pay the Reimbursement Fee,

7.5 Basis of Reimbursement Fee

The amount payable by Linden pursuant to clause 7.2 and Brightstar pursuant to clause 7.3 is purely and strictly compensatory in nature and has been calculated to reimburse the receiving party for costs including the following:

- (a) fees for legal, financial and other professional advice in planning and implementing the Takeover Bid (excluding success fees);
- (b) reasonable opportunity costs incurred in engaging in the Takeover Bid or in not engaging in other alternative or strategic initiatives;
- (c) costs of management and directors' time in planning, considering and implementing the Takeover Bid; and
- (d) out of pocket expenses incurred by a party's employees, advisers and agents in planning, considering and implementing the Takeover Bid,

and the parties agree that:

- (e) the costs actually incurred will be of such a nature that they cannot all be accurately ascertained; and
- (f) the amount payable is a genuine and reasonable pre-estimate of those costs,

and each party represents and warrants that it has received advice from its external legal adviser on the operation of this clause 7.

7.6 Compliance with law

This clause 7 does not impose an obligation on a party to pay the Reimbursement Fee to the extent (and only to the extent) that the obligation to pay the Reimbursement Fee:

- (a) is declared by the Takeovers Panel to constitute 'unacceptable circumstances'; or
- (b) is determined to be unenforceable or unlawful by a court,

provided that, in either case, all lawful avenues of appeal and review, judicial and otherwise, have been exhausted. For the avoidance of doubt, any part of the Reimbursement Fee that would not constitute unacceptable circumstances or that is not unenforceable or unlawful (as applicable) must be paid by the relevant party. To the extent that the Reimbursement Fee has already been paid, the recipient of the Reimbursement Fee must refund the relevant portion of the Reimbursement Fee paid under this agreement within 5 Business Days of receipt of a demand for refund.

7.7 Reimbursement Fee payable only once

Where the Reimbursement Fee becomes payable to Brightstar under clause 7.2 or Linden under clause 7.3 and is actually paid, the recipient of the Reimbursement Fee cannot make any claim against the other party for payment of any subsequent Reimbursement Fee.

7.8 Limitation of liability

Notwithstanding any other provision of this agreement, except in relation to a wilful or intentional breach of or non-compliance with any provision of this agreement by the party which pays the Reimbursement Fee:

- (a) the maximum liability of a party to all other parties under or in connection with this agreement including in respect of any breach of this agreement will be the Reimbursement Fee;
- (b) a payment by a party in accordance with this clause 7 represents the sole and absolute liability of that party under or in connection with this agreement and no further damages, fees, expenses or reimbursements of any kind will be payable by that party in connection with this agreement; and
- (c) the amount of the Reimbursement Fee paid to the recipient under this clause 7 shall be reduced by the amount of any loss or damage recovered by any other party in relation to a breach of this agreement.

7.9 Reimbursement Fee not payable by Linden

Despite any other provision of this agreement:

- (a) if:
 - (i) the Offers become or are declared unconditional, notwithstanding the occurrence of any event referred to in clause 7.2; or
 - (ii) as at the earlier of the date of termination of this agreement and the End Date, Linden was entitled to terminate this agreement under clause 9.1(a),
 then:
 - (iii) the Reimbursement Fee is not payable by Linden to Brightstar; and

- (iv) if the Reimbursement Fee or any part of it has already been paid by Linden to Brightstar it must be refunded by Brightstar to Linden:
 - (A) in relation to clause 7.9(a)(i), within 5 Business Days after the end of the Offer Period; or
 - (B) in relation to clause 7.9(a)(ii), within 5 Business Days after Linden first becomes entitled to terminate this deed under clause 9.1(a); and
