

## FURTHER DRILL RESULTS SHOW HIGH-GRADE TITANIUM MINERALISATION AT MULTIPLE PROSPECTS ON NARRYER JV

Narryer Metals Limited (ASX: NYM) (**Narryer or Company**) refers to the announcement lodged by Petratherm Limited (ASX: PTR) (**Petratherm**) today titled “*Greenfields Exploration Drilling Overcovers a New Styles of High-Grade Titanium Mineralisation at Muckanippie*”

This announcement includes 42 of the 49 drillhole results on the Narryer’s JV tenure at the Muckanippie Titanium Project (**Muckanippie** or the **Project**) in South Australia. Muckanippie contains both 100% owned Petratherm tenure and tenure currently owned by Narryer, subject to a Joint Venture arrangement with Petratherm.

Please refer to the Petratherm Limited (ASX: PTR) ASX Announcement today (19 February 2025) for further details regarding these positive exploration results, including full details of drill results and JORC Tables 1.

### Executive Chairman Richard Bevan said

*“What we see again are outstanding drill results from the Narryer JV tenure in the Muckanippie Ti Project of South Australia. The mineralisation thickness, potential grades and possible strike length at the new prospects of Nardoo-Dukes and Claypan, could make this another significant titanium deposit in the area. This compliments the Rosewood Discovery, which also partly sits on the Narryer JV ground.*

*Narryer looks forward to further results in coming weeks, including further heavy mineral analysis and early-stage metallurgical work on samples from the Narryer JV tenure.*

*These outstanding results come from the initial exploration drill program, with Narryer looking forward to more drilling to come.*

*We congratulate Petratherm for their progress to date”*
