

ASX RELEASE | CLEARVUE TECHNOLOGIES LIMITED | (ASX:CPV | OTCQX:CVUEF)

ClearVue Investor Update Presentation

Ahead of the Company's 13 August 2025 Investor Update presentation, ClearVue shares content of its planned presentations to the market.

HIGHLIGHTS:

- **Accelerating Commercialization:** ClearVue's executive team presents how the Company is accelerating commercialization on a global scale.
- **Operational Focus:** The operational focus is on product optimisation, effective OEM and vendor management, best-in-class compliance and certification and product delivery excellence.
- **Research and Development:** The Company's research and development is concentrated on removing barriers to adoption of ClearVue's Solar Façade.
- **Business Development:** A low cost go-to-market strategy which is repeatable and scalable is driving commercialization forward with a strong partner strategy.
- **Marketing Communications & Branding:** ClearVue marketing is making a concerted effort to strongly highlight what makes ClearVue superior, engaging with and supporting our partners and actively driving demand generation.
- **Sustainability Strategy:** Using a net zero to zero approach to sustainability with a spotlight on climate resiliency, biodiversity, circularity and ESG disclosures.
- **Global Commercialisation Takes Shape:** Company continues path to global commercialisation.

13 August 2025 – Perth, Australia – ClearVue Technologies Limited (ASX:CPV) (ClearVue or the Company) shared its presentation content as the Investor Update event began in the Company's Perth headquarters under full disclosure.

"It is a privilege to have this opportunity to bring our extended team together to share how we are moving from innovation to impact with our shareholders. We have the right team to accelerate ClearVue's global commercialization," said Mr. Douglas (Doug) Hunt, Managing Director and Chief Executive Officer, ClearVue Technologies. "The future is bright, and we have built a solid foundation for continued innovation and growth. Our R&D strategy is reducing the barriers to broad market adoption. Our sound and pragmatic operational approach is ensuring we have the business foundation in place to take the business forward to drive long term

shareholder value. Our business development, partner engagement and marketing efforts are supporting revenue generation, increased profitability and market share growth. We have a strong partner engagement plan, and our business development is on the right track. In addition, our agenda for aligning ClearVue's strategy with net zero to zero programmes is providing a strategic advantage in collaborating with our partners and customers around the globe. I am proud of our team of dedicated professionals and the collaborative environment we are creating with our internal team and board members, shareholders, partners and customers. We are happy to share the ClearVue Investor Update presentation with our shareholders. We look forward to working together to make buildings more sustainable as we shape ClearVue's position on the global construction and real estate development landscape."

Authorised by the Board of ClearVue Technologies Limited.

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Limited (ASX: CPV; OTCX: CVUEF) is an Australian technology company that integrates solar technology into building façade and rooftop surfaces to provide renewable energy generation and offset the operational carbon footprint of buildings. The Company's advanced, patented glass technology preserves glass transparency maintaining building aesthetics while generating energy.

ClearVue has extended solar energy-generation to vision glass, cladding, spandrel, balustrade, and skylight solutions. These solutions can offset operational energy requirements significantly contributing to the net zero building.

ClearVue's integrated solar façade is revolutionizing the way buildings are designed, constructed, and renovated. Experience how building façades will become a major contributing factor to reducing operational carbon by visiting ClearVue at www.clearvuepv.com. ClearVue's integrated solar façade is revolutionizing the way buildings are designed, constructed and renovated.

Major Competitive Advantages

	Feature/Benefit	ClearVue
Architectural	Size Flexibility	Up to 2350mm x 4500mm
	Thickness	2+2mm laminated to 25+25mm laminated
	Colour & Pattern	Full range and can be customised
	Shapes and Curves	Customizable to meet requirements
Electrical	Cells	Crystalline silicon Compatible to all PERC/Shingled/Topcon/BC technologies
	Density	Can be customised
	Power output	Up to 210 W/m ²
	Tolerance	± 5%
Structural	Trafficable	✓
	AS 4284 Façade Testing	✓

Major Competitive Advantages

	Feature/Benefit	ClearVue
Thermal	Insulated Glazing Unit (IGU) Integration	All products can be integrated into double glazing units without compromising IGU seal
	Argon Gas	✓
	Vacuum Glass Integration	✓
	Low-e coating	✓
	Thermal Transmittance (U-Value)	0.4 - 1.7 W/m ² K for a CPV solar DGU
Reliability	IGU seal - ASTM E 2190, EN1279.2, AS 4666	✓
	Junction Box	IP 68
Fire	ANSI/UL 790 (roof mounted)	Class A
	Combustibility (EN13501.1, wall mounted)	A2-s1, d0 (Limited Combustible)
	Ignitability (AS 1530.3)	Compliant

Major Competitive Advantages

	Feature/Benefit	ClearVue
Warranty	Product Warranty	Up to 12 years by regions
	Power Output Warranty	30-year 80% solar cell output warranty
Installation & Maintenance	Framing & Installation	No additional modification on existing framing system due to rear mounted junction box
	Maintenance	Same as standard glazing system
Technical Support	Local Service	Global service

Materiality Matching

Operational Priorities

- **Production Optimisation** – Support R&D to reduce production time and cost
- **OEM & Supplier Management** – Strengthening partnerships, quality control and assurance
- **Compliance & Certification** – Maintaining global standards and technical accreditations
- **Cross-Functional Collaboration** – Bridging technical, commercial, and executive functions
- **Product Delivery Excellence** – Timely, on-budget, high-quality project outcomes

From Innovation to Impact

Accelerating Global Commercialisation

Innovation to Accelerate Commercialisation

- BIPV needs to be a building material first, and a power generator second
- By reducing the barriers to entry, ClearVue can accelerate commercialisation
- ClearVue already has the best products on the market, but to stay ahead, we need to:
 1. Reduce barriers to install
 2. Improve payback periods

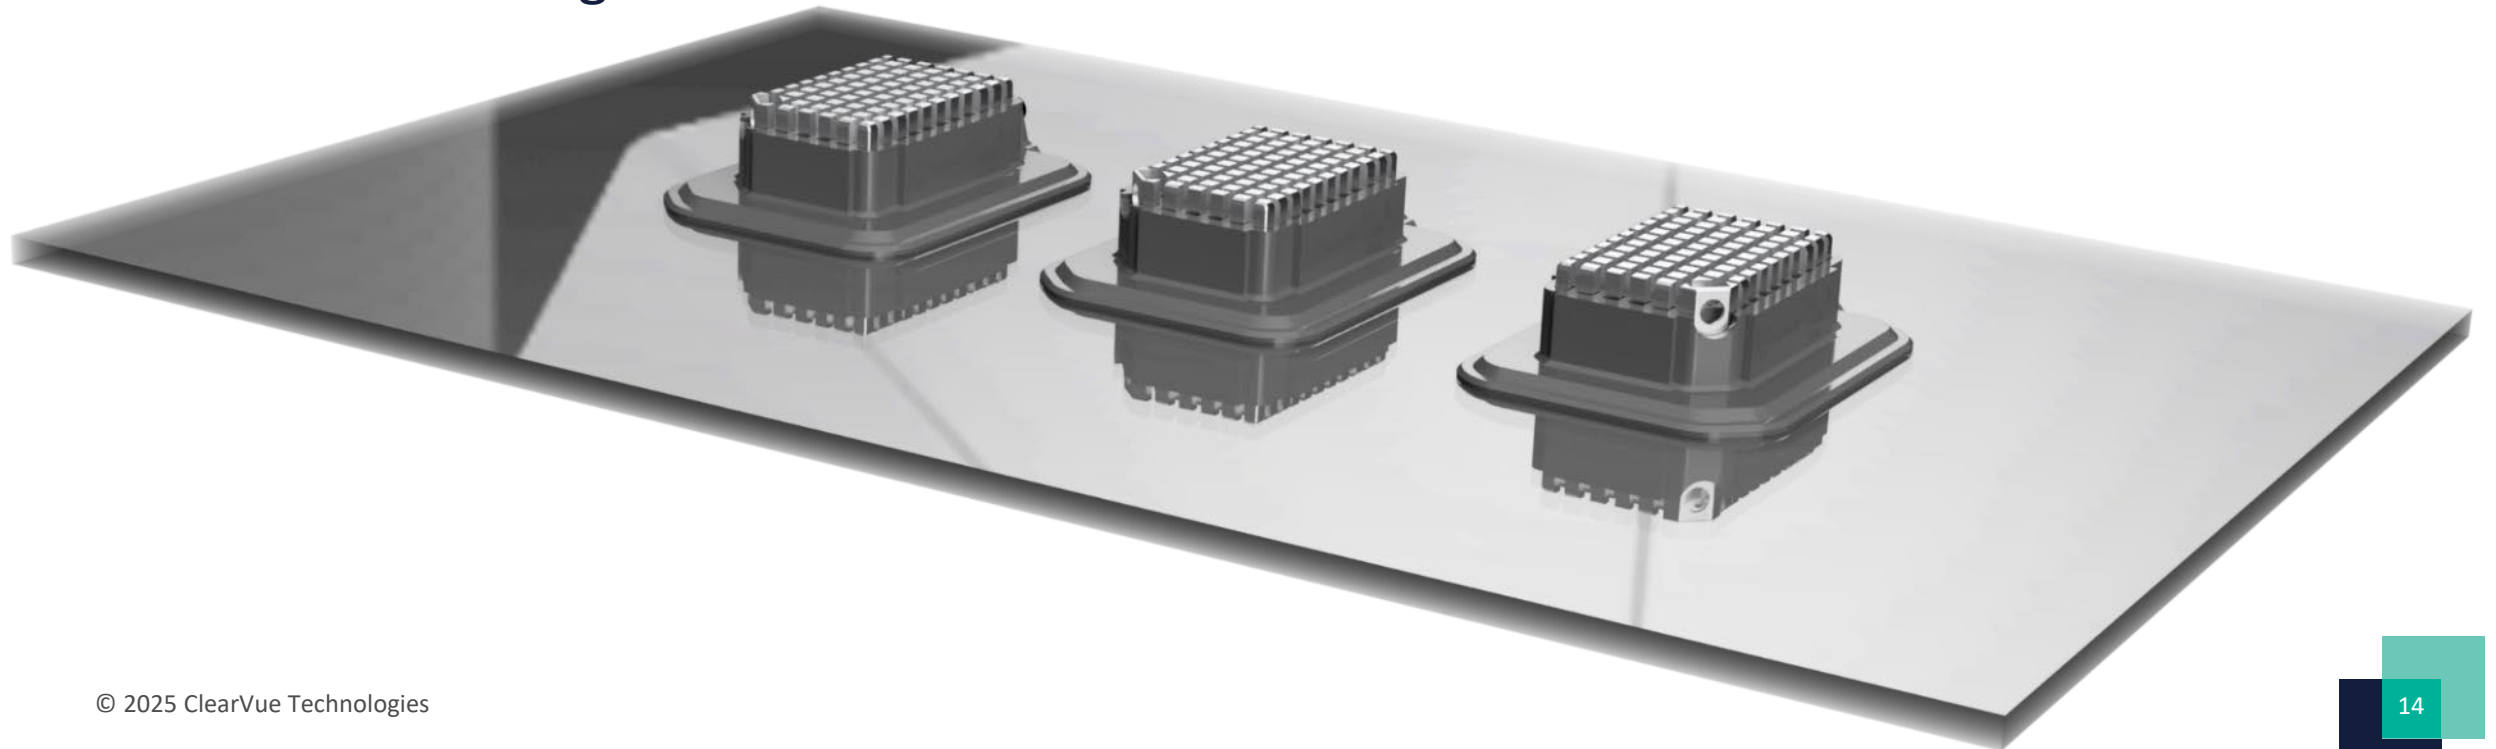

Reducing Barriers to Install

- ClearVue products need to be a building material first, and an energy generator second.
- If we can demonstrate to stakeholders that ClearVue products are no different to the materials they are used to working with, adoption will accelerate.
- This means addressing traditional industry pain points head-on with innovations to:
 - Reduce installation costs
 - Improve fire performance
 - Demonstrate significant longevity
 - Maximise thermal performance

Reducing Barriers to Install - Example

- Improves product reliability
- Improves fire performance
- Product differentiator
- Seamless integration

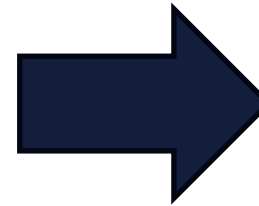

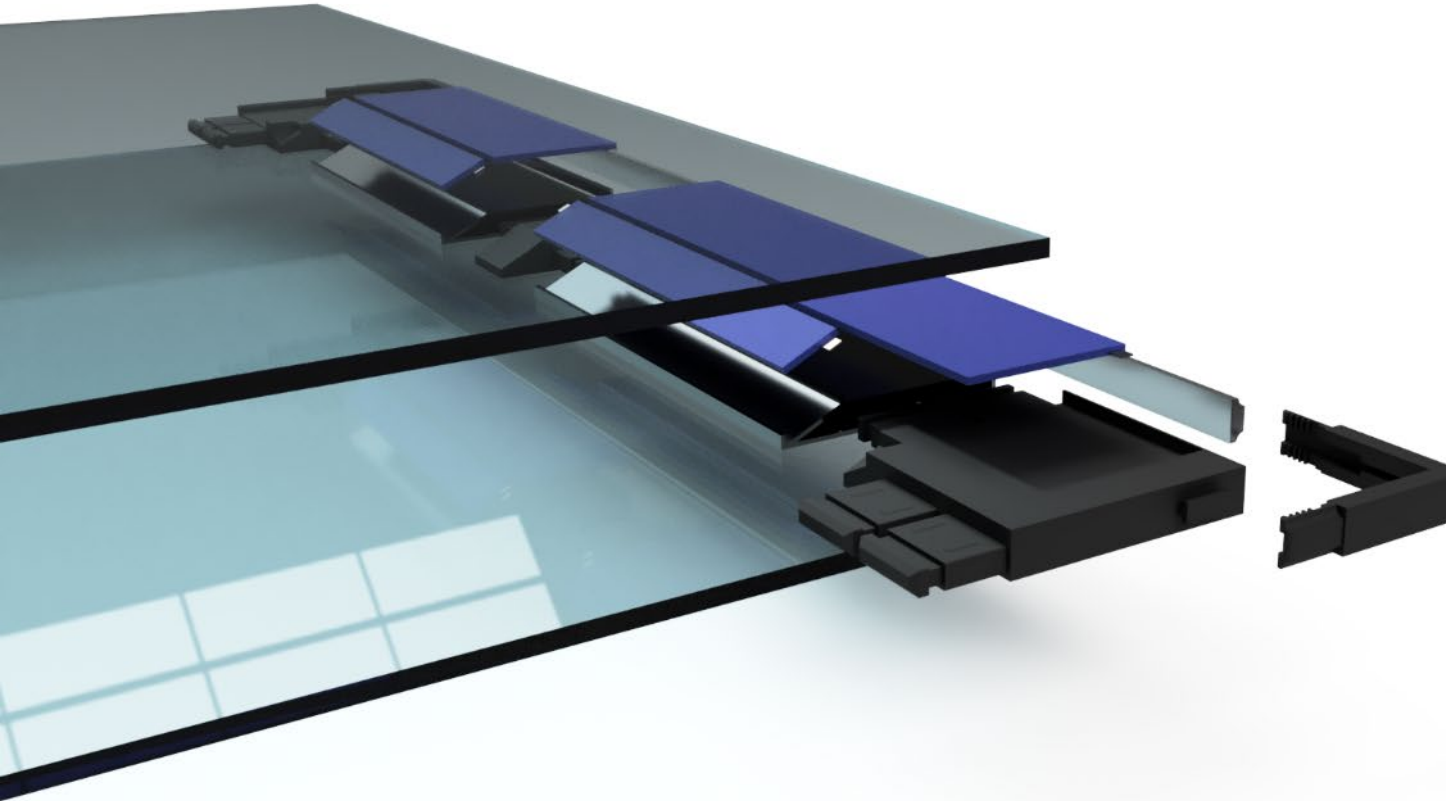

Improving Payback Periods

1. Reduce manufacturing complexity and cost
 - Collaboration with licensees on manufacturing pain points
 - Improving system design for manufacturing at scale
2. Increase power generation
 - Innovating on module design and efficiency

Improving Payback Periods - Example
