TERRA METALS ADDED TO MSCI GLOBAL INDEX

Terra Metals Limited (ASX:TM1) (Company) is pleased to advise that the Company has been included in an MSCI Global Index, following MSCI's semi-annual index review in May 2026.

MSCI (Morgan Stanley Capital International) is a leading global index provider whose benchmarks are widely used by institutional investors and investment funds around the world.

Inclusion in an MSCI Global Index is expected to increase the Company's profile among institutional investors and investment products that utilise MSCI benchmarks, further broadening awareness of the Company and its exploration portfolio.

The MSCI Australia Micro Cap Index comprises 456 Australian listed companies and forms part of MSCI's global suite of equity benchmarks used by investors worldwide.

About the Dante Project

The **Dante Project**, located in the **West Musgrave region of Western Australia**, hosts a globally significant, multi-metal discovery within the Jameson Layered Intrusion – part of the **Giles Complex**, a mafic-ultramafic system comparable in scale and style to South Africa's Bushveld Complex. The Giles Complex sits at the junction of three major geological provinces (North, West and South Australian Cratons), offering **exceptional regional prospectivity**.

First assays from the **Southwest Prospect** – part of the Dante Project – have confirmed a **major platinum group metal (“PGM”) sulfide discovery**, returning bonanza-grade hits up to **52.97g/t PGE3**. A comprehensive drilling program is currently underway at Southwest focused on expansion and resource definition, following which, the Company plans to proceed with economic studies on the future development of the Project.
